

DATA ANALYTICS POWERED BY TABLEAU

***PROJECT TITLE: ANALYZING THE
PERFORMANCE & EFFICIENCY OF THE
RADISSON HOTELS USING DATA VISUALIZATION
TECHNIQUES***

Team ID : NM2023TMID05412

Team leader : Divya M G

Team Members: 1. Ashika C J

2. Abina R

3. Bercy B L

PROJECT REPORT

1. INTRODUCTION

1.1 Overview

The hotel industry is a broad category of businesses that provide lodging services for travellers and tourists. This can include a wide range of establishments, from luxury resorts to budget-friendly motels, as well as extended stay hotels, boutique hotels, and more. Hotels can be found in nearly every corner of the world, and are often a major component of the tourism and travel industry in a given area.

Radisson owns multiple five-star hotels across India. They have been in the hospitality industry for the past 100 years. Due to strategic moves from other competitors and ineffective decision-making in management, Radisson is losing its market share and revenue in the luxury/business hotels category. As a strategic move, the managing director of Radisson wanted to incorporate Business and Data Intelligence in order to regain their market share and revenue. Our task is to create an analytics dashboard & story to provide them insights to make better business decisions.

1.2 Purpose

The purpose of this project is to improve the performance and efficiency of Radisson Hotels include identifying KPIs, comparing performance across different hotels, identifying patterns and trends over time, identifying affecting factors, creating interactive dashboards and reports, identifying areas for improvement, making data-driven decisions, comparing to industry average and creating forecasting models for future performance. The ultimate goal is to gain insights and improve performance through data visualization techniques.

2 PROBLEM DEFINITION & DESIGN THINKING

2.1 Empathy Map

[illegible]

2.2 Ideation & brainstorming Map

Brainstorm & idea prioritization

Use this template to your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

- Brainstorming
- Idea prioritization
- Workshop activities

by [Brainstorming](#)

Before you collaborate

Before you collaborate, make sure you have a clear understanding of the problem you're trying to solve. This will help you focus your brainstorming efforts on the right ideas.

[View](#)

Define your problem statement

Before you can brainstorm, you need to have a clear understanding of the problem you're trying to solve. This will help you focus your brainstorming efforts on the right ideas.

[View](#)

Brainstorm

Now it's time to brainstorm! Write down any ideas that come to mind, no matter how small or silly they may seem. The more ideas you generate, the better your problem-solving efforts will be.

[View](#)

Group ideas

Now it's time to group your ideas. Write down any ideas that come to mind, no matter how small or silly they may seem. The more ideas you generate, the better your problem-solving efforts will be.

[View](#)

Prioritize

Now it's time to prioritize your ideas. Write down any ideas that come to mind, no matter how small or silly they may seem. The more ideas you generate, the better your problem-solving efforts will be.

[View](#)

After you collaborate

Now it's time to reflect on your brainstorming session. Write down any ideas that come to mind, no matter how small or silly they may seem. The more ideas you generate, the better your problem-solving efforts will be.

4. ADVANTAGES AND DISADVANTAGES

Advantages

Data analytics in the hospitality industry can help hoteliers to develop a strategy for managing revenue by using the data gathered from various sources like the information found on the internet.

By using hotel data analytics, you can get information like customers feedback about their services and experience at the hotel.

Disadvantages

Hotels operate with a lot of data sources – each of them storing different information in different formats. This makes it challenging trying to decide which data to use for analysis and what purpose this data will serve. With a business domain, it makes the task-specific for the hotel industry.

5. APPLICATIONS

It is used to find the rate of occupancy. Tracking the demand during different seasons can help the reservations department at a hotel arrive at optimal rates for rooms, and ensure the right discounts or their capping, closer to booking dates. Analytics helps sales and marketing teams work on accurate messaging to go out to their dataset to boost reservations. It helps to improve Revenue Management and helps to create unique services and experiences.

6. CONCLUSION

By the visualization we will get the total revenue of the hotels, number of successful bookings and cancelled bookings and also get the highest successful bookings in city. This information will be used to take better business decisions and regain their market share and revenue. Thus, it is used to identify areas for improvement and take steps to enhance the customer experience, and increase customer satisfaction and loyalty. Improve its brand reputation, which can lead to increased customer loyalty and repeat business.

7. FUTURE SCOPE

The dashboard and story are used to identify the areas of improvement and making data-driven decisions. This information is used to enhance the future action. By comparing to industry average, it helps to forecasting model for future performance. Proper planning and decision should be made to improve customer satisfaction.
